---

PROFESSIONAL SUMMARY

Data-driven Informatics Engineering graduate with hands-on experience in SQL, Python (Pandas, NumPy), and end-to-end data analysis covering preprocessing, visualization, and reporting. Background combines relational database design, ETL workflows, and machine learning project delivery with three years of multilingual, GDPR-compliant stakeholder communication in client-facing operations. Proven ability to translate raw datasets into actionable business insights, build clean data pipelines, and communicate findings to both technical and non-technical audiences.

CORE COMPETENCIES

- **Data Analysis & Reporting:** SQL querying, data cleaning, ETL, exploratory data analysis (EDA), KPI tracking, dashboard development, statistical analysis
- **Programming:** Python (Pandas, NumPy, scikit-learn), SQL, R (fundamentals), JavaScript, PHP, C
- **Data Visualization:** Matplotlib, Seaborn, Excel (charts, PivotTables), Power BI (familiar), Tableau (familiar)
- **Databases:** MySQL, PostgreSQL, relational schema design, query optimization, Laravel ORM
- **Microsoft Office 365:** Advanced Excel (PivotTables, VLOOKUP, formulas, conditional logic), Word, PowerPoint
- **Project & Workflow Tools:** JIRA, Agile methodology, Git, version control
- **Methods:** Descriptive & inferential statistics, machine learning fundamentals, market analysis, A/B testing concepts, GDPR data handling
- **Soft Skills:** Stakeholder communication, problem solving, attention to detail, critical thinking, cross-functional collaboration
- **Languages:** English (fluent), Portuguese (fluent), Hindi (native), Nepali (native)

PROFESSIONAL EXPERIENCE

CUSTOMER SUPPORT & RECEPTIONIST (MULTILINGUAL: ENGLISH, PORTUGUESE, HINDI, NEPALI)

Advocate Office — Dec 2023 to Nov 2024

- Accomplished accurate, GDPR-compliant management of client records, as measured by zero data-protection incidents across [X+] cases, by maintaining structured digital records, enforcing access controls, and auditing intake data weekly.
- Standardized multilingual client-to-government communication workflow, as measured by a [X%] reduction in average case turnaround time, by acting as live interpreter and creating reusable response templates for recurring inquiries.
- Accelerated front-desk throughput, as measured by a [X%] increase in appointment fill rate, by implementing a centralized scheduling log and prioritization rules for walk-in versus booked clients.
- Resolved client inquiries across chat, phone, and email channels, as measured by [X%] first-contact resolution, by triaging issues and routing complex cases to relevant subject-matter experts.

CUSTOMER SERVICE REPRESENTATIVE (ENGLISH)

Cluster — Sep 2022 to Nov 2023

- Exceeded monthly customer service KPIs (response time and satisfaction ratings) by [X%], as measured by internal performance dashboards, by prioritizing high-impact tickets and following structured escalation paths.
- Standardized issue-resolution playbook across [X+] product categories, as measured by a reduction in average handle time of [X%], by collaborating with cross-functional teams to document recurring fixes.
- Delivered technical product support across [X+] daily contacts, as measured by sustained CSAT above [X%], by combining product knowledge with empathetic, structured communication.

WEB DEVELOPER

Durga — 2021

- Designed and implemented relational database schemas with Laravel ORM, as measured by [X%] reduction in query response time, by normalizing tables, indexing key columns, and rewriting inefficient SQL queries.

- Built scalable Laravel (MVC) web applications, as measured by successful production deployment of [X] modules, by translating business requirements into structured backend logic and reusable components.
- Administered enterprise-level systems (servers, networks, storage), as measured by [X%] system uptime, by performing routine configuration, patching, and performance monitoring.

CUSTOMER SUPPORT REPRESENTATIVE (ENGLISH)

Tulsi — 2017

- Resolved customer inquiries via email and chat, as measured by issue resolution within agreed SLAs, by combining product knowledge with structured troubleshooting.
- Documented recurring issues and solutions, as measured by [X%] reduction in repeat tickets, by contributing to the internal FAQ and knowledge base.

PROJECTS

Machine Learning — End-to-End Data Analysis Pipeline Delivered a full ML workflow (data preprocessing, feature engineering, model training, evaluation) using Python, Pandas, NumPy, and scikit-learn, as measured by [X%] model accuracy on the validation set, by applying cross-validation and feature selection. Produced exploratory data analysis and visualizations to communicate findings to non-technical stakeholders, by combining Matplotlib and Seaborn charts with concise written reporting.

E-Shop Platform (Frontend and Backend) Designed and shipped a full-stack e-commerce application with a relational database backend, as measured by working catalog, cart, and checkout flow, by integrating an SQL data layer with REST endpoints and a responsive frontend.

Blog Site / Timetable App / Training Site Backend Developed multi-feature web applications using Laravel, React, and SQL databases, applying clean schema design, CRUD APIs, and authentication.

Snake Game Implemented game logic and state management as a programming fundamentals exercise to reinforce data structures and algorithmic thinking.

EDUCATION

Bachelor’s Degree in Informatics Engineering IPB — Polytechnic Institute of Bragança, Portugal | 2018 to 2023 Relevant coursework: Databases, Algorithms & Data Structures, Statistics, Machine Learning, Software Engineering, Object-Oriented Programming.
